

程式9(a) ACOUSTICS by MRM

- ### **1. Problem statement:**

$$\begin{aligned} G.E.: \quad & (\nabla^2 + k^2)p(x, y) = 0, \quad (x, y) \in D \\ BC: \quad & \frac{\partial p}{\partial n} = 0, \quad (x, y) \text{ on the boundaries} \\ \text{where } k = & \frac{\omega}{c}. \end{aligned}$$

2. Fill in the acoustic frequencies in following table

Mode no.	(a)	(b)	(c)
1			
2			
3			
4			
5			

- 3. Please show**

- (1). BEM mesh
 - (2). Pressure contour for acoustic modes
 - (3). 3-D plot for pressure of acoustic modes
