國立台灣海洋大學河海工程研究所 BEM 2007 第 11 次作業

Please run BEPO2D program for the solution $\nabla^2 u(\rho, \phi) = 0, u(1, \phi) = \cos(5\phi)$

Some discussions:

- (1) Number of nodes and elements ?
(2) Boundary layer effect for u and $\partial u / \partial x$ near (1,0) ?

$$\begin{cases} \nabla^2 u(\rho, \phi) = 0 \\ u(1, \phi) = \cos(5\phi) \end{cases}$$
