Trefftz method :

$$\nabla^2 u(x) = 0, \quad x \in D$$

$$u(x) = \cos(3\theta), \quad x \in B$$

(a) By choosing T-complete set,  $\ln r, \frac{1}{r} \cos \theta, \frac{1}{r} \sin \theta, \frac{1}{r^2} \cos 2\theta, \frac{1}{r^2} \sin 2\theta$ , find

the Trefftz solution using the point collocation approach.

(b) By choosing T-complete set,  $\ln r, \frac{1}{r} \cos \theta, \frac{1}{r} \sin \theta, \frac{1}{r^2} \cos 2\theta, \frac{1}{r^2} \sin 2\theta,$

$\frac{1}{r^3} \cos 3\theta, \frac{1}{r^3} \sin 3\theta, \frac{1}{r^4} \cos 4\theta, \frac{1}{r^4} \sin 4\theta$ , find the Trefftz solution using the

point collocation approach.

Extend the HW2 to exterior problem (Two cases :  $r=1$  and  $r=2$ )

$$u(x) = \ln 2 + \frac{1}{8} \cos(3\theta), \quad x \in B$$

Ans : Exact solution :  $u(r, \theta) = \ln r + \frac{1}{r^3} \cos 3\theta$
