

Meshless methods

1. MLPG (meshless local Petrov-Galerkin method) S. N. Atluri
2. EFG (element free-Galerkin method) Belytschko
3. RKPM (Reproducing kernel particle method) W K Liu
4. BNM (Boundary node method) S. Muhkerjee
5. Trefftz method Trefftz
6. Boundary knot method W Chen
7. Unity of partition
8. SPM (smooth particle hydrodynamics)
9. Local boundary integral equation method J Sladek
10. Imaginary-part kernel method
11. RBF (radial basis function) C S Chen
12. Meshfree method G R Liu
13. Boundary collocation method
14. MFS (Method of fundamental solution)
15. HP cloud
16. NDIF (Nondimensional influence function method)
17. Moving least square method
- 18.
